BESTON

Company Introduction
2013
Foundation

2014
Pyrolysis & Distillation & Egg tray

2015
Acquisition & Beston factory

2017
Uzbekistan Overseas, $8 million

NOW
Romania Overseas

MSW Sorting Plant
CULTURE

MISSION
To build a better life human society with innovation and service

VISION
To create the excellent quality, being the industry leader, and become the world’s most influential environmental enterprise

VALUE
Customer is the first, passionate & dedication, honesty & altruism, embrace change
PRODUCTS AND SERVICE

Product introduction
To separate the municipal solid waste into plastic, metal, paper, organic and inorganic materials.

Biomass Carbonization Plant
To process the waste biomass into charcoal.

Egg Tray Plant
To process the waste paper into egg trays.

Waste Recycling Project
MSW reprocess to fuel oil, charcoal, fertilizer, bio-gas, electricity and so on.

Waste Pyrolysis Plant
To process the waste tire/plastic/oil sludge into fuel oil and carbon black.

Business Partner
We have cooperated with many companies.
Customized services could be provided with original price.

We Beston has a registered capital of $13 million with 20000㎡ factory space and 2400㎡ office area, more than 300 staffs, the completed google, purchase, documents, financial department.

We have more than 8 years of experience in dealing with waste process project, trained a professional technician, sales, QC, after-sales team to guarantee the most professional products and service.

As of now, we have established offices in Europe, Central Asia, and Southeast Asia, providing the most efficient technical support and after-sales service.
Commitment to 100% new equipment, to provide customers with equipment production follow up

Commitment products and services meet the requirement of contract

Promise to ensure the equipment installation and commissioning qualified production, regular after-sales search
SUCCESSFUL CASES

Installed in Korea in 2016
20TPD WASTE OIL SLUDGE PYROLYSIS PLANT*3

During 2014 – 2015, three of our pyrolysis equipment were installed in Nigeria, the owner is SSENL Company

- Advanced automatic feeding and discharging technology guarantees the equipment’s daily processing capacity to 20tons per day per unit.
- Advanced pretreatment process ensures that the raw material will not stick the reactor, and realize the continuous operation

Until now, all the equipment has worked well, they bought another 2 units in March.
In 2015, 2 units of waste tire pyrolysis plant, 2 units of oil distillation plant and 2 units of carbon black grinder have been installed in Brazil, the owner is WTO Group.

Turnkey project provides one-stop service for customer, until now, all the equipment are running well.
So far, the msw sorting plant has running normally, carbonization and pyrolysis plants is now ready for the final commissioning operation, all other equipment is expected to complete the installation and put into production in May, 2018.

From 2016 to 2017, our series msw sorting plant, waste plastic pyrolysis plant, biomass carbonization plant, paper making plant, composting plant, PET washing line are exported to Uzbekistan successively, and this is also the first comprehensive project of our company.
THANK YOU!
